

***Dallas Valley Ranch Camp***

**Indoor Riding Arena**

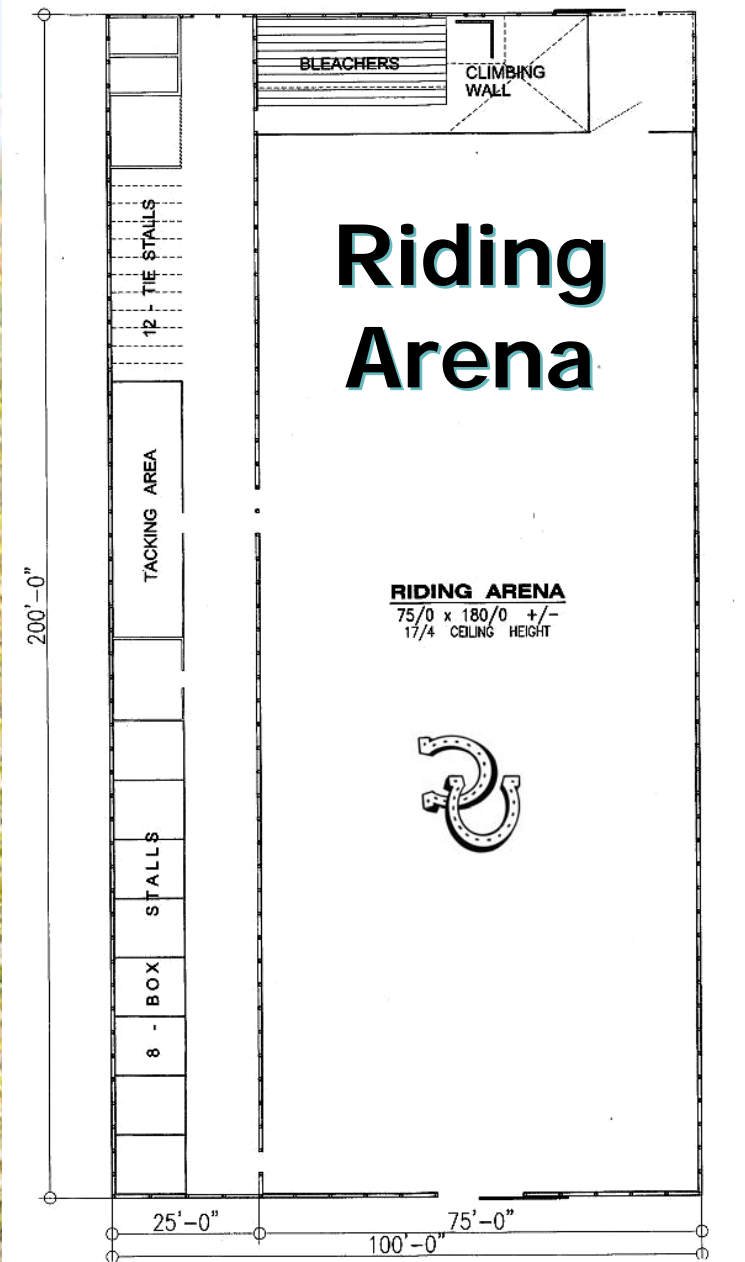

# A Riding Arena? WHY?

The riding arena will provide much needed support to our riding program and will give us new opportunities to have an effective ministry to youth and adults who have a keen interest in horsemanship and wall climbing skills. We need this facility because ...

- .. It will allow us to continue with our riding activities in inclement weather during our summer camps, as well as during our fall, winter, and spring months when we serve school groups and other guest groups.
- .. It will include an indoor climbing wall which will give us another skill activity during those periods of the year when our outdoor wall and ropes courses are not in operation.
- .. It will make it possible for us to host gymkhana competitions, horse shows, and other horsemanship events. This will give us a door of opportunity to build relationships with people who are passionate about horses and riding and have a ministry to them.
- .. It will give us the opportunity to conduct riding lessons and provide advanced training in wall climbing skills during the winter months. These classes will include a Bible study and other activities geared to provide spiritual help for our participants. These classes will provide us with an effective follow-up ministry to our summer campers who are especially interested in these skills.
- .. It will give our riding director a much needed indoor facility to train and condition horses in our riding string during the late fall to spring seasons when our outdoor arenas are unusable.

**Indoor Riding Arena**

## Phase 1 – Completed

Includes labor, materials, equipment rental, sub contracts for outer shell.

**April 9/08:** Phase 1 construction began.

**Nov. 27/09:** Outer shell is complete and paid for.

The riding area has been sanded and has been in basic use since spring of 2009.

Tie Stalls are installed.

The climbing wall is complete and is in use.

# Phase 2 – Incomplete

### Why do we need to finish the arena?

- To be able to offer riding lessons and indoor climbing year-round.
- To train horses year-round.
- To care for sick or injured horses.
- Other winter events.

### Cost to complete phase 2:

Insulation, vapor barrier, PVC liner	43,700
Blown in Insulation (Ceiling)	16,800
Lighting Power Main Service	40,000
Labour for finishing Inside	32,500
<b>TOTAL</b>	<b>133,000 Plus</b>
Fundraised to date:	69,000

### Cost to complete phase 3:

Plumbing, Concrete, heating	75,000 Plus
-----------------------------	-------------

An aerial photograph of the Dallas Valley Ranch Camp. The camp is situated in a valley with rolling green hills and yellow fields. In the center, there is a large, multi-story building with a brown roof, surrounded by a parking lot with several cars. To the right of this building is a blue pond with a red boat. Further right, there are several smaller white and blue buildings. In the foreground, there is a large, open field with a dirt path leading through it. A callout box with a white background and a black border points to a building in the foreground, with the word "Arena" written inside in white text.

**Arena**

**Thank your considering the possibility of financing this project. We will not continue with construction on the arena without the funds because the camp board has made a policy to never go into debt.**
